 # 301 Name: **Su River** Cause: **Lightning** Admin: **L&W**
 Narrative: The fire was 100% active, running, crowning, and spotting in black spruce and mixed hardwoods. The Trapper Lake Area was evacuated. The plan for the next operational period includes cabin and structure protection, but is dependant upon resource availability. Significant growth is expected to occur. A lack of road access and the marshland is expected to make suppression efforts difficult. A Type 2 Team is on order. *Note that the name of this fire changed.

# 278	Name: Caribou Hills		Cause: Human	Admin: CIRI

Narrative: Early recons of the fire and mobilization of resources prepared the fire for a 1000 transition to Jandt's Type 2 Team. Fire behavior was active to extreme throughout the day. Fire weather warnings for building thunderstorms with possible down drafts and variable winds prompted strong safety issues. Local utility companies tried to survey damage to 3-4 miles of major transmission lines. Mid-day fire growth proceeded steadily with some localized airtanker and helicopter support until 1830, when the main fire crossed Deep Creek to the north. Continuous fuels, beetle kill, and inaccessibility mixed with structures lead to the initiation of interagency evacuation efforts and 2 additional airtankers. Afternoon runs to the north and east dramatically increased the fire's size. No injuries were reported.
